Project Developments & Updates across the Guyana-Suriname Basins

Recent discoveries leading to over 16 billion barrels of oil are driving major ongoing interests in the Stabroek Block and the wider basin. With massive volumes of high-grade reserves coupled with low breakeven production costs of sub--\$35 per barrel, the opportunities presented by the latest licensing round are second to none.

Hear from the operators, analysts and engineering leaders currently active in the exploration of the basin and discover what's coming next. Each presentation will last 10-15 minutes, before Q&A opens to the audience:

Presenter 1: **Bob Fryklund**, Vice President, Upstream Energy, **S&P Global Commodity Insights**

Presenter 2: **Ahmad Shamsul Kamal Zakaria**, Country Manager, **PETRONAS Suriname Exploration & Production B.V**

National Oil Company Panel Debate: Shaping Upstream Growth in Partnership, Creating Beneficial Working Relationships for the Long-Term

Regional NOCs in the Caribbean and Latin America have extraordinary opportunities to develop next-generation low-carbon, low-impact resources at optimum cost. Partnerships with international operators, technology providers, fiscal and taxation experts, and with institutional and sovereign wealth; will shape meaningful business relationships for many decades to come. What must local national custodians of assets deliver on to ensure partnerships are a lasting success that benefit their populations, socio-economic prosperity, and ecosystems?

DRAFT PROGRAMME

With E&P activities ramping up offshore Guyana and Suriname, industry and governments must be ready to respond to an oil spill, if one should occur. The Trade Associations are committed to collectively working together, and in partnership with governments and other key stakeholders, in facilitating the latest in technical competencies and promoting recommended practices that provide vital capabilities towards enhancing oil spill prevention, preparedness, and response (OSPFR).

Governments play a vital role in devising, implementing and enforcing the regulatory framework on OSPFR and their cooperation with key stakeholders is vital to ensure a successful outcome.

This session will focus on:

- *The role and competencies of International Trade Associations (API, IOGP, IADC and ARPEL) and the resources and services they offer.*
- *How can key industry and government players improve collaborative efforts to build the pathway towards solving the challenges related to OSPFR*
- *Case studies from Operators in the Region*
- *Existing intergovernmental and government/industry OSPFR Initiatives in the Region*

DRAFT PROGRAMME

Organised by:

Even with its huge and continuing oil and gas discoveries Guyana's vast forest offers it the opportunity to act as a Carbon Sink. With strong renewable energy potential Guyana aims to sustain its growing energy demand while meeting the most urgent climate challenge the world faces today. Guyana's Low Carbon Development Strategy (LCDS) for 2030 aims to maintain its position as a biodiversity nest, while solidifying its position as a world-class hydrocarbons industry leader and ensuring sustainable economic and social developments. How does Guyana's forest cover and LCDS maintain the country's position as a leading actor in the energy transition while still meeting its energy demand and extracting its natural resource wealth?
